RE: (IL1670080 – Sangamon County) Determination of Ground water Under the Direct Influence of Surface Water

Dear Mr. McCord:

This is in response to your letter dated December 22, 2011 requesting a change in the designation of the South Sangamon Water Commission (SSWC) wells. Previously, they had been designated by the Illinois EPA as Groundwater Under the Direct Influence of Surface Water based on the information presented to us by your consulting engineer prior to SSWC obtaining a construction permit and the wells being drilled. Based on the information presented in your letter, review of the construction permit applications and associated information, and a site visit, we have determined that the ten wells shown in the attachment to your letter are not under the direct influence of surface water.

Should you have any questions regarding the above, please contact Dave Cook at the indicated telephone number or address.

Sincerely,

Jerry H. Kuhn, P.E.

Manager, Permit Section
Division of Public Water Supplies
