Re: South Sangamon Water Commission (Sangamon County - 1670080)
"As-Built" Plans for Plant Improvement Operating Permit No. **0420-FY2013**

Gentlemen:

We are in receipt of "as-built" plans consisting of 46 sheets titled "South Sangamon Water Commission; New Water Treatment System; Contract 'A' Re-design: Well Field" which were prepared by your engineers, Donohue & Associates. This project consisted of the following improvements: the installation of 10 well pumps, each rated at 250 gpm @ 148 feet TDH. The plan documents were received in this office on October 29, 2012 and have been reviewed for compliance to minimum design and construction requirements for Illinois public water supplies.

Based on the "as-built" information submitted, it appears that the improvements made to your public water supply conform to minimum requirements for public water supply construction. Section 15 of the Environmental Protection Act states "Owners of public water supply, their authorized representative, or legal custodians, shall submit plans and specifications to the Agency and obtain written approval before construction of any proposed public water supply installations, changes or additions is started." Therefore, in the future, the plan data for any changes or additions to the supply must be submitted and approved prior to the start of construction.

This letter may be considered as an operating permit for the improvements to the public water supply described above.

Acknowledgment of these "as-built" plans in no way affects the legal action that may result from construction of this project without obtaining a permit from this Agency as required by the Environmental Protection Act.

A handwritten signature in black ink, appearing to read "D. Cook".

David C. Cook, P.E.
Acting Manager, Permits Section
Division of Public Water Supplies
